DETAILED ACTION

Drawings

1. Figures 12 and 13 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1-13 are allowed.
3. The following is an examiner's statement of reasons for allowance: Prior art of record fails to teach, disclose or suggest, either alone or in combination, a semiconductor integrated circuit device including the combination of limitations as claimed. Specifically, the prior art did not teach the structure claimed in independent claim 1 including word lines that extend in a first direction, bit lines extending in a direction different from the first direction, and buried wirings formed in the insulating layer in electrical isolation from the semiconductor substrate and the semiconductor layer, the buried wirings extending in parallel with the bit lines.

Art Unit: 2815

Prior art does teach buried wirings, but does not teach the buried wirings having the structure claimed. For instance, Ohsawa (U.S. Patent No. 6,538,916 B2) teach the buried wirings 20 as shown in figure 19 extending parallel to the word lines 13 and not parallel to the bit lines. In figure 20 Ohsawa teach a single buried wiring (misabeled 11 in figure 20) that is formed as one wire under the entire array of devices and thus does not read on the plural wirings of claim 1. No motivation or suggestion has been found in the prior art to modify the buried wiring(s) to obtain the structure as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fukuzumi (US 2004/0058506 A1) and Ikehashi et al. (U.S. Patent No. 6,825,524 B1).
